

SHOBHIT JAIN

Tech Lead | Cloud-Native Microservices | AI/OCR & IDP | BFSI & Mortgage Domain
+91-9511770243 | shobhitingicts@gmail.com | Pune, India | [LinkedIn: linkedin.com/in/shobhit-jain-05968875/](https://www.linkedin.com/in/shobhit-jain-05968875/)

PROFESSIONAL SUMMARY

Results-driven Tech Lead/Java Architect with 12+ years of experience delivering cloud-native, event-driven systems for US and global BFSI and Mortgage clients. Currently leading the architecture of a high-volume Intelligent Document Processing (IDP) platform processing 200,000+ documents daily using AI/OCR technologies (AWS Textract, Tesseract) at Moder Solutions (an ArchWell Company). Deep expertise in Spring Boot microservices, AWS serverless (Lambda, SQS, SNS), Redis caching, and real-time document pipelines. Proven ability to lead distributed teams, reduce operational costs, and architect scalable platforms from the ground up.

KEY ACHIEVEMENTS

200K+ Documents processed daily	40% Reduction in operational costs	50% Faster loan approvals via IDP	65% API latency reduction via Redis
70% Accuracy gain in doc extraction	50K+ Daily SQS event-driven workflows	45% Doc validation cost reduction	6+ Developers mentored on OCR/ML

PROFESSIONAL EXPERIENCE

Tech Lead / Architect

Moder Solutions (An ArchWell Company) | Pune, India

Jul 2024 – Present

Project: Intelligent Document Processing (IDP) Platform — US Mortgage Client

Spearheaded architecture and development of a cloud-native IDP platform for mortgage loan processing, automating extraction of structured data from 200,000+ daily unstructured documents and achieving a 30% accuracy gain and 50% faster loan approvals.

- Designed Spring Boot microservices (**Java 17**, Spring Data JPA) with multi-environment deployment via Spring Profiles across dev/staging/production
- Architected event-driven workflows using AWS SQS/SNS and Redis Cache to orchestrate real-time document processing pipelines, **reducing operational costs by 40%**
- Implemented an **AI-powered FAQ chatbot** using Confluence as the knowledge base and **Amazon Bedrock** LLMs, enabling accurate, context-aware responses and improving application support efficiency.
- Led RESTful API strategy using Feign Client, achieving **65% latency reduction** through Redis caching strategies
- Built AI/OCR integration layer using AWS Textract and Tesseract with GhostScript pre-processing, handling **200,000+ documents daily** with 70% higher accuracy over legacy system
- Orchestrated SQS event-driven workflows for **50,000+ daily** document processing tasks across microservices
- Implemented Mockito/JUnit testing framework, cutting deployment failures by **50%** through CI/CD automation (Jenkins, Docker)
- Managed full offshore Java development team; **mentored 6+ engineers** on OCR optimization and MongoDB aggregation pipelines
- Leveraged **Claude AI and Cursor AI** for accelerated development, code review automation, and architecture documentation; utilized Palantir Foundry (Ontology System) for data integration and operational workflows

Stack: Java 17, Spring Boot, AWS (SQS, SNS, S3, Textract, Redis, CloudFront), Feign Client, Docker, Jenkins, JWT, Tesseract, GhostScript, MongoDB, REST APIs, SFTP, Amazon Bedrock, Confluence Integration

Senior Technology Specialist

Xoriant Solutions Pvt. Ltd. | Pune, India

Jul 2019 – Jul 2024

Project I: DASH — Mortgage Document Automation Service Hub Platform (Freedom Mortgage, USA)

Architected and developed a scalable document classification and extraction platform for Freedom Mortgage, USA, reducing document validation costs by 25% and replacing multiple legacy systems.

- Architected enterprise-grade cloud-native platform (Spring Boot + AWS) **from scratch** to process high-volume mortgage documents
- Reduced document validation costs by **25%** through automated AI-based classification and intelligent routing
- Integrated AI/OCR pipeline (Tesseract, AWS Textract) with **SQS/SNS messaging** for real-time throughput
- Implemented Redis caching for frequently accessed classification results; improved system throughput significantly
- Worked in Agile/Scrum — sprint refinement, retrospectives, backlog grooming with US-based product owners

Stack: Java 11, Spring Boot, AWS (SQS, SNS, S3, Textract, Redis), Feign Client, Docker, Jenkins, JWT, Tesseract, GhostScript, OCR, SFTP, MongoDB

Project II: LORAX — Product Development Management System (Bayer)

- Developed enterprise Spring Boot application for Bayer's sales management and approval workflow platform
- Built and consumed RESTful APIs; implemented **OAuth 2.0** for secure authorization flows
- Used Spring Data JPA and connection pooling with SQL Developer; wrote complex SQL/Quartz scheduler queries
- Integrated AWS S3 and Microsoft Azure for document storage and cloud operations

Stack: Java 8, Spring Boot, Spring Data JPA, Oracle, Quartz, OAuth 2.0, AWS S3, Microsoft Azure, JWT, Apache Tomcat

Staff Consultant

Oracle Financial Services Software Ltd. | Pune, India

Oct 2016 – Jun 2019

Project: Flexcube Core Pricing & Billing — Barclays Bank (Global)

Implemented Oracle Flexcube Core Pricing and Billing engine for Barclays Bank's global retail banking operations, enabling competitive pricing across consumer banking products worldwide.

- Developed and implemented OLTP transaction modules, maintenance transactions, and batch processing uploads for Barclays
- Used ETL for complex database processing in batch schedulers; Crystal Report development for business reporting
- Integrated **IBM WebSphere MQ** for reliable messaging between Flexcube modules and external banking systems
- Bug fixing, manual testing, and problem rectification across multiple Flexcube banking modules

Stack: Java 6, PL/SQL, Oracle 10g, IBM WebSphere MQ, IBM WebSphere, Sybrin, Crystal Reports, Hibernate, ETL, XML

Software Developer / Consultant

Intellect Design Arena Ltd. | Pune, India

Jun 2014 – Sep 2016

Project I: e-Kuber — Core Banking System for Reserve Bank of India (RBI)

- Developed modules for **RBI's Intellect CBS** integrating with government ministries for daily cash flow and year-end reporting
- Built large-scale i-Reports for RBI's daily economic data; enabled government macro-economic decision-making
- Implemented third-party integrations for large-scale financial data processing using SOAP/XML web services

Stack: Java 6, J2EE, JSF 1.2, Oracle 10g, JBoss 4.2, i-Report, SOAP, XML, JavaScript, JSP, Schedulers

Project II: Collateral Management System (CMS) — Sveriges Riksbank, Sweden

- Implemented CMS for Sweden's Riksbank to automate collateral pledging, credit management, and transaction processing
- Developed middleware for seamless third-party integration and large-volume data reporting (i-Report)

Stack: Java 6, J2EE, JSF 1.2, Oracle 10g, JBoss 4.2, i-Report, JSP, JavaScript, XML, SOAP

TECHNICAL SKILLS

Languages	Java (17, 11, 8, 6), J2EE
Frameworks	Spring Boot, Spring MVC, Spring Data JPA, Spring Profiles, Hibernate
Cloud / AWS	EC2, S3, Lambda, SQS, SNS, CloudWatch, CloudFront, AWS Textract, Redis Cache (ElastiCache), EKS (learning)
Messaging	AWS SQS/SNS, ActiveMQ, IBM WebSphere MQ
AI / OCR	AWS Textract, Tesseract OCR, GhostScript — IDP pipeline design & optimization, AWS Bedrock . llm's(Claude , Chat GPT)
Databases	MongoDB (Aggregation, Templates), Oracle, PostgreSQL, DB2
DevOps / CI-CD	Docker, Jenkins, Maven, Sonar, GitHub Actions, Terraform, Putty
Security	OAuth 2.0, JWT
API / Integration	REST APIs, Feign Client, SOAP, WSDL, Swagger, Postman, Insomnia, SFTP
IDEs / Tools	IntelliJ, Eclipse, NetBeans, MongoDB Compass, Visual VM, JIRA
App Servers	Apache Tomcat, JBoss, WebSphere
AI Tools	N8N , Claude AI (Anthropic), Cursor AI, Palantir Foundry (Ontology System)

EDUCATION

Master of Computer Applications (MCA) 2011 – 2014

Maulana Azad National Institute of Technology (NIT), Bhopal — CGPA: 8.54 / 10
(First Class)

Bachelor of Computer Applications (BCA) 2008 – 2011

Makhanlal Chaturvedi National University of Journalism & Communication, Bhopal
— 72.26%

AWARDS & RECOGNITION

- Toast Master and Consistency Champion awards for exceptional performance , design , client handling and leadership
- Star & Titan Award — Xoriant Solutions (multiple times) for best performance, delivery excellence, and analytics leadership
- Best Engineer Award — Intellect Design Arena, for outstanding development performance and delivery
- GEM Award — Intellect Design Arena, for exceptional contribution to project success and client delivery
